Why Invest in this fund?

- A truly global approach for US dollar investors, the Fund holds a diversified portfolio of equity and fixed income securities that are income producing with an aim to deliver superior risk-adjusted returns in all market environments.
- In fixed income, the Fund selects from the broadest array of securities globally to build a portfolio that provides the best value for risk.
- The equity style is core, investing in quality companies anywhere in the world.

Risk Tolerance

| | | |
|-----|---------------|------|
| LOW | MEDIUM | HIGH |
|-----|---------------|------|

* Effective June 1, 2022, the redemption charge purchase option, and the low-load purchase option are no longer available for purchase, including those made through systematic purchase plans such as pre-authorized contribution plans. Switching from securities of a Mackenzie Fund previously purchased under the redemption charge or low-load purchase options to securities of another Mackenzie Fund, under the same purchase option, will continue to be available until such redemption schedules expire.

** The blended index is composed of 52.5% MSCI World and 47.5% BofA Merrill Lynch Global Broad Market (Hedged to USD).

*** The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio.

**** Credit ratings and rating categories are based on ratings issued by a designated rating organization.

† Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns as of November 29, 2024 including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Standard deviation provides a measure of the variability of returns that have occurred relative to the average return. The higher the standard deviation, the greater is the range of returns that has been experienced. Standard deviation is commonly used as a measure of risk.
